AMENDMENTS TO THE CLAIMS

Claims 1-9 (CANCELLED)

10. (PREVIOUSLY PRESENTED) An ice fishing display device for use with a base assembly with a fishing line and a tip-up arm mounted to the base assembly, comprising:

a weatherproof reflective enclosure containing a flashing light source and a tiltable switch such that said flashing light source is electrically connected to said tiltable switch;

said enclosure having a lens at one end covering said flashing light source;

a reflective membrane surrounding said enclosure such that the display device can be seen by other operators;

an electrical cord connected to said enclosure at one end and having a plug at a second end;

said electrical cord having removable fasteners mounted along its length such that said electrical cord is attached to said tip-up arm;

said reflective enclosure mounted to an upper end of said tip-up arm;

a rubber bushing mounted at a second end of said reflective enclosure to seal said electrical cord to said electrical enclosure;

a power source detachably mounted to the base assembly;

said power source having a case containing a battery, a battery socket, and having a connector socket protruding outside of said case;

said battery socket mounted to a printed wiring board; and

said electrical cord is connected to said power source by removably inserting said plug into said connector socket so that said power source can be changed;

whereby when a fish strikes, said tip-up arm is released from a lowered position and said tiltable switch electrically connects said power source to said enclosure so that said flashing light source illuminates to signal a user of a fish strike.

11. (CANCELLED).
